Summary from today's visit:

This patient was assessed by a pediatric allergist at the BC Children's Hospital and

- Is allergic to: _____
- This medication should be avoided
 - We will update your hospital record with this allergy
 - Your family doctor will be notified so that your medical record can be updated
 - Please bring this letter to your pharmacist so that PharmaNet can be updated
 - Other similar medications that should be avoided:

- Is NOT allergic to: _____
- An oral drug challenge to drug: _____ dose: _____ was tolerated in the allergy clinic
 - This medication may be prescribed again with no increased risk for adverse reaction above the baseline population.
 - We will update your hospital and PharmaNet medical record
 - Your family doctor will be notified so that your medical record can be updated
 - You should monitor for any rashes over the next several days. Should a rash or other concerns arise, please contact our clinic. Delayed rashes are often bothersome but do not increase your risk of life threatening allergic reactions.

Follow up: _____

Sincerely,
